

ORLOFF SOLAR GROWN COLLECTION™

Luxury powered by the sun.

An invitation to become one of twenty-five founding retail partners for Solar Grown lab-grown diamond engagement rings in 18K gold.

STARTER COLLECTION	RINGS INCLUDED	RETAIL MARGIN	MINIMUM REORDER
2 600 USD	3	[?]	None

INTERNAL DRAFT, 15 fields require confirmation before circulation. Highlighted throughout.

THE DIFFERENCE

We don't ask you to trust an adjective.

Most lab-grown suppliers compete on price alone. That is a race you cannot win and would not want to.

We compete on documentation. Every environmental claim in this collection comes with the paperwork behind it: the solar share of our production, chain-of-custody records for the gold, a certificate for every stone. Your customer can see the evidence rather than be asked to take our word for it.

That is a deliberately narrower claim than the industry norm, and a far more useful one on a shop floor. It is what turns a browsing couple into a sale at full margin instead of a price negotiation.

SPECIFICATION

What is in every Solar Grown ring

DIAMOND

Lab-grown CVD, produced with **[CONFIRM: X]** % solar energy

Via **[CONFIRM: on-site PV / PPA / RECs]**. Chemically, physically and optically identical to a mined diamond, and always described to consumers as lab-grown.

CERTIFICATE

[CONFIRM: IGI / GIA] report with every stone

GIA now issues lab-grown reports using descriptive categories rather than the D-Z colour and clarity scales. Confirm which report the customer receives and what it states.

METAL

18K gold from certified recycled sources

Chain-of-custody documentation available on request. Standard: **[CONFIRM]**

PRESENTATION

Beech wood box, natural linen interior

Handcrafted from Denmark's national tree. No synthetic lining. **[CONFIRM: FSC certified?]**

PRODUCTION

Made to order, any size, no stock required

[CONFIRM: N] days production plus **[CONFIRM: N]** days shipping, direct from our facility.

BEECH, DENMARK'S NATIONAL TREE

EVERY RING IS PRESENTED IN A BEECH BOX WITH A NATURAL LINEN INTERIOR

THE COLLECTION

Twelve engagement designs

Your Starter Collection is three rings selected from the twelve Solar Grown engagement designs. The full catalogue is available to partners at wholesale from day one.

01 DESIGN	02 DESIGN	03 DESIGN	04 DESIGN	05 DESIGN	06 DESIGN
07 DESIGN	08 DESIGN	09 DESIGN	10 DESIGN	11 DESIGN	12 DESIGN

[CONFIRM: the twelve designs], each slot needs a model name, centre stone carat, quality tier (Prestige VS1/F or Signature SI1/H), and a photograph on a plain ground.

THE OFFER

The Starter Collection

- Three handcrafted 18K gold Solar Grown lab-grown diamond rings, chosen from the twelve designs
- Professional product photography, [CONFIRM: N] images licensed for your use
- Ready-to-use social media video, [CONFIRM: N] clips
- Counter display material
- Diamond certificate for every stone
- Retail sales training, [CONFIRM: format]
- Digital sales support and full catalogue access
- Direct delivery from our production facility

Starter Collection	2 600 USD
Recommended retail, three rings	[CONFIRM]
Typical retail margin	[CONFIRM]
Investment recovered after	[CONFIRM]
Minimum monthly order	None
After the Starter Collection, order individual rings at wholesale. No stock commitment, no annual target, no exclusivity required of you.	

What a distributor cannot give you

Direct from production

No distributor layer and no distributor margin. You buy from the facility that makes the ring.

No stock commitment

2 600 USD is three rings, not a warehouse. Order one at a time after that, or twenty.

Any size, made to order

Nothing sits in inventory, so no size is unavailable and no size costs extra.

You deal with the founder

Not an account queue. Thirty-five years in fine jewellery and coloured stones, on the other end of the email.

BEFORE YOU DECIDE

Three days in Hua Hin

We host prospective partners at our production facility in Thailand for a supplier evaluation and product training programme.

DAY 1

Production

Facility tour. How CVD stones are grown, our energy sourcing, gold refining and casting, quality control.

DAY 2

Product training

The full collection, grading tiers, how to read and explain a certificate, and how to sell lab-grown to a sceptical customer.

DAY 3

Commercial discussion

Terms, margins, marketing support, and your questions.

[CONFIRM: who pays for what], state exactly which of accommodation, meals during the programme and airport transfers are covered. Partners arrange and pay for their own international flights.

As the visit is for supplier evaluation and product training, the business portion may be treated as business travel depending on your circumstances. Rules differ by country and we are not qualified to advise on them. Please consult your accountant.

QUESTIONS

What partners ask first

What exactly is a Solar Grown diamond?

A lab-grown diamond produced by chemical vapour deposition using **[CONFIRM: X]** % solar energy. Chemically, physically and optically identical to a mined diamond. "Solar Grown" describes our production energy. The stones are lab-grown and always described that way to consumers.

What is the retail margin?

[CONFIRM] Full wholesale price list provided on application.

Are prices in US dollars?

Yes. The Starter Collection is 2 600 USD and the wholesale price list is quoted in US dollars. Prices are held for 30 days from quotation.

Who handles import duty and VAT?

[CONFIRM: DDP or DAP] Goods ship from Thailand. There is no EU–Thailand free trade agreement, so standard third-country duty applies to articles of precious metal, plus import VAT at your national rate, reclaimable if you are VAT registered.

[CONFIRM: landed or pre-clearance, and importer of record]

Can I return unsold rings?

[CONFIRM], the single most important answer in this document. If there is an exchange or buyback, lead with it. If there is not, say so plainly.

Do I have to buy exclusively from Orloff?

No. No exclusivity is required of you, and no minimum order applies after the Starter Collection.

What if I need a size you don't stock?

Everything is made to order, so any size is available at the same price.

Is the gold really recycled?

Yes, 18K gold from certified recycled sources, with chain-of-custody documentation available on request. Standard: **[CONFIRM]**

FOUNDING PARTNERS

Twenty-five places across the Nordics

Applications close **[CONFIRM: date]**.

[CONFIRM: territory terms, or delete], do not imply an exclusivity you will not honour.

Our goal is not to become the biggest supplier. It is to become the one you trust most.

To apply, or to request the full wholesale price list, write to **info@orloffofdenmark.com**.
